# Benefits of NETBOARD

## Benefits at a Glance

### Versatile (3-in-1)

- Multiple Purpose digital pen(ADP-601) and AG/AR high visibility CORNING Gorilla Glass
- IWB with digital pen + whiteboard with marker pen + high visibility projector screen
- You can use it as normal board/screen if IWB is not used
- You can save space/cost due to elimination of extra projector screen
- You can have clean writing environment with no frame/sensor/electric power

## Comparison Table of EWB and NET BOARD

Other company's electronic blackboard	NET BOARD
 <p>PDP → LCD → LED</p> <p>Expensive and difficult maintenance</p> <p>Limited Sizes</p> <p>No marker whiteboard function</p> <p>Electromagnetic field</p> <p>High power consumption</p> <p>Electromagnetic, Pressure, Camera, IR, Ultrasonic, etc.</p> <p>Expensive and slow response time</p> <p>Need an outer frame</p> <p>Maintenance problem</p>	 <p>Ultra short-throw of just short-throw projector</p> <p>Cheap and easy maintenance</p> <p>Cost effective 100" above large size</p> <p>3 in 1 multiple usages</p> <p>Digital pen reads the dot-pattern</p> <p>Cheap and fast response time</p> <p>No outer frame</p> <p>NET BOARD enables easy installation and maintenance</p> <p>Durability</p>
<p>Low durability</p> <p>Contamination due to scratches, shock, etc.</p> <p>Difficult to maintain flatness and reduces visual distortion</p>	<p>High durability</p> <p>Semi-permanent usage</p> <p>Superior flatness due to glass material</p> <p>Safety CORNING Gorilla Glass</p>

# Differentiated features and interior

## No power, no heat, no EMI, no shock hazard!

G-board does not require any external electrical power source, as opposed to other sensor attached type IWBs (100% EMI free)

## Seamless interior installation

- Replace conference room's glass boards
  - Enables existing wall utilization
  - Glass board + high visibility screen + IWB
- Adaptability to many interior configurations  
More flexible in space planning

## Initial cost: 3-in-1 and much less expensive than the display type

- Multiple functions enable easy and versatile installation
- Cost difference vs display increases as size becomes larger

03

04

## Various configurations

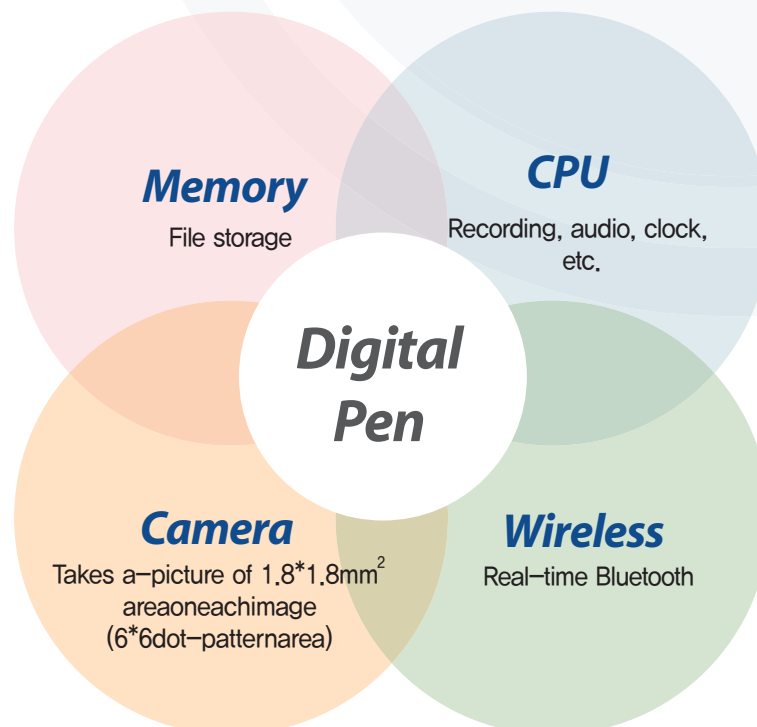

Combines with an existing classroom 3-division white board  
Makes the IWB area an entire wall glass mount  
Combines with a custom installation of luxury furniture  
Allows moving type, hanging type, stand-alone type, etc.

# Multi-Purpose

## Multi-purpose digital pen (ADP-601)

Unlike conventional dedicated digital pen, ADP-601 multi-purpose digital pen not just for IWB

Note taking, drawing, etc. on dot-pattern papers

**Note**

Interactive White Board

**Electronic Board**

Remote two-way learning

**Remote**

Digital textbook in public education

**Digital Textbook**

Input device to mobile devices

Currently supports Android smartphone, tablet, etc

**Tablet**

# Accurate/Simple

## Introduction of the digital pen technology

ADP-601 is an optical pen that directly detects a 0.3mm pitch dot on the surface of the **IWB and is interference free** (shadow, EMI, IR, heat, etc.)

Dot pattern gives absolute position. No distance errors

- unlike ultrasonic, IR, cameras, electro-magnetic type sensors which use relative positioning.

No sensor frame required

→ Locates the position at the first stroke and starts storing automatically

→ Records the tracing of the pen by recognizing the change of dot-pattern at 50~70fps

### Dot Pattern

Fine and pleasant pattern recognition

05

06

# Two-way learning platform

Multi-way learning system connected with NET BOARD and digital pen

Able to share and learn each students' writings by displaying on NET BOARD through the projector

Able to compare and explain by writing on NET BOARD

Able to save and upload on Cloud

# Various Utilization of Digital Pen

## 📍 Dot patterned whiteboard Interactive White Board

## Overlay glass / IWB / Note

ADP 601 is a general writing device  
not just for specific applications

## 📍 Dot patterned note A5 Starter Note / B5 Standard Note A4 Research Note / Pen+Pad

## 📍 Dot patterned note A5 Starter Note / B5 Standard Note A4 Research Note / Pen+Pad

# Writing program

## Writing program features

### 100% utilization of the existing teaching materials

- MS office, HWP, PDF, image, movie, etc.
- Maximizing advantage of teaching material by providing the variety of viewer programs

### E-learning Platform

- Utilizing already owned equipment
- Providing one-click recording function on-site classroom
- Making a base-line of e-learning via interactive learning after school

### Maximizing the effect by uploading

- Computer screen, voice, images and writing by one-click recording
- Supports various file-formats (BDF, JPG, PDF, etc.)

### Support teacher-centered education process

- Before the class(taking advantage of teaching materials)
- During the class (writing program, assisted teaching materials, screen board, contents library, screen navigation)
- After the class(screen capture, video recording, uploading)

## Floating Palette

Writing mode floating

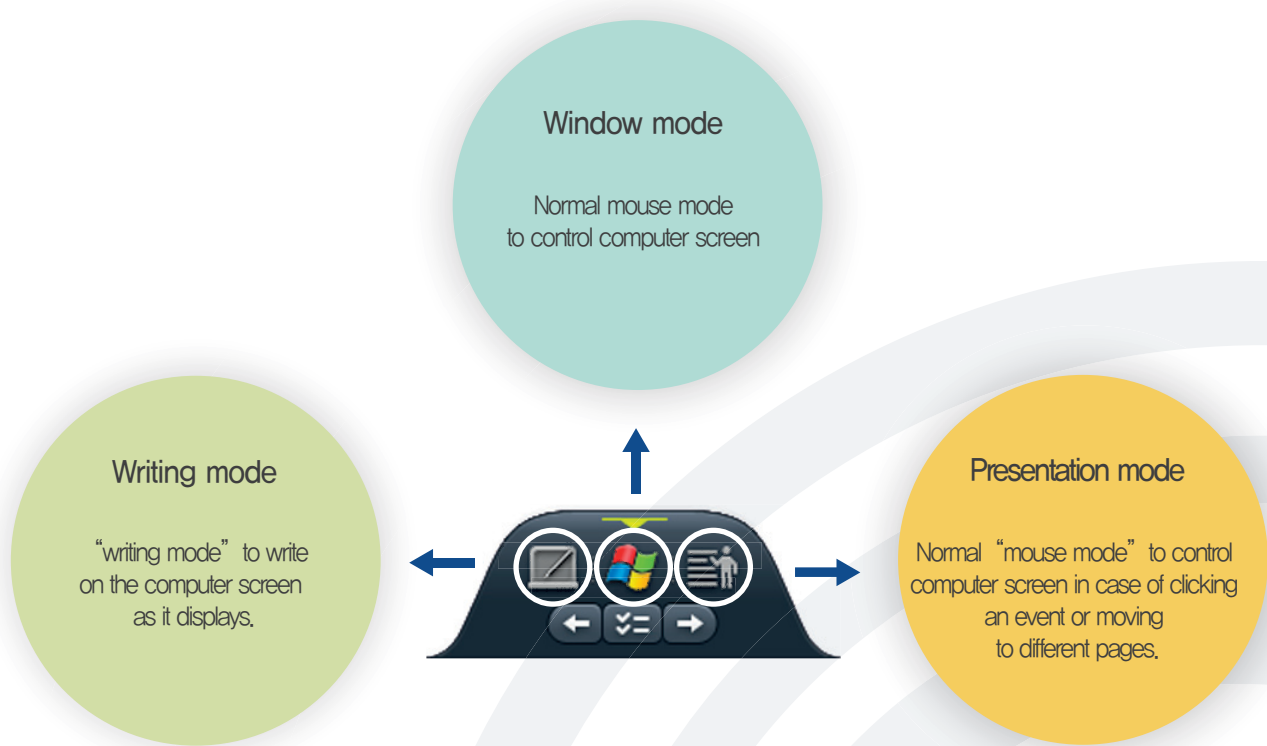

PT mode floating

Using floating mode, easy to write in any corner of NET BOARD

# Key features

Controlling detailed features on the right-side by choosing main toolbar icon on the left-side.

09  
—  
10

## Convenient function

- Screen navigation (zoom in and out)
- Floating palette
- Menu position and hide

## Writing support

- Three types of pen (general pen, blush, and high lighter)
- Various pen thickness and colors
- Diagram
- Various eraser

## Add-ons

- Win7 multi-writing function
- Dual monitor
- Shortcuts for menu
- Interworking with X-point presenter

# NET BOARD Spec, characteristic

NET BOARD provides the best communication solution to schools, companies, and conferences.

Application examples

## Digital pen specification

Model	ADP-601
Weight	148*14.3*18.8mm
MMI	19g
Charge	red/green LED
Communication	USB mini
Operating angle	bluetooth 2.0
Operating time	-20~40'
Storage temp	0~40°C
Operating temp	-20~65°C
Certification	CE, FCC, WEEE, VCCI, KC
System requirement	WindowsXP(SP3), Vista, 7 and 8

## Product configuration

11

12

## Screen specification

Model	S-NET BOARD G1850-7	S-NET BOARD G2000-20	S-NET BOARD S2000	S-NET BOARD S3200
Feature	AG glass surface screen / AG transparent sheet			
Characteristic	Glass surface of the screen		Reflective transparent sheet	
Screen size(only glass)	1850(W)*1500(H)	2000(W)*1200(H)	2000(W)*1200(H)	3200(W)*1200(H)
Screen ratio	3,7:3	15:9	15:9	24:9
Touch	dot-pattern recognizing digital pen			
Coordinate recognition	dot-pattern image recognition			
Dot pattern spacing	0.3mm			
Surface	AG CORNING Gorilla Glass 0.7mm	AG CORNING Gorilla Glass 2mm	AG Transparent Sheet	AG Transparent Sheet
Back side	Tempered Glass 5mm or 3mm		Adhesives, iron, magnetic, silicon, etc. ..	Adhesives
Thickness	Under 10mm(Excluding the frame)		N/A	N/A
Digital pen interfaces	Blue tooth 2.0 (Provide a separate dongle)			
Software	PenHub(Digital Pen software) / PowerACE(Writing Program)			

■ The size of the product can be subject to change by the manufacturer.

# Step-by-Step Approach

**STEP 1 Teacher** (G board + pen + program)

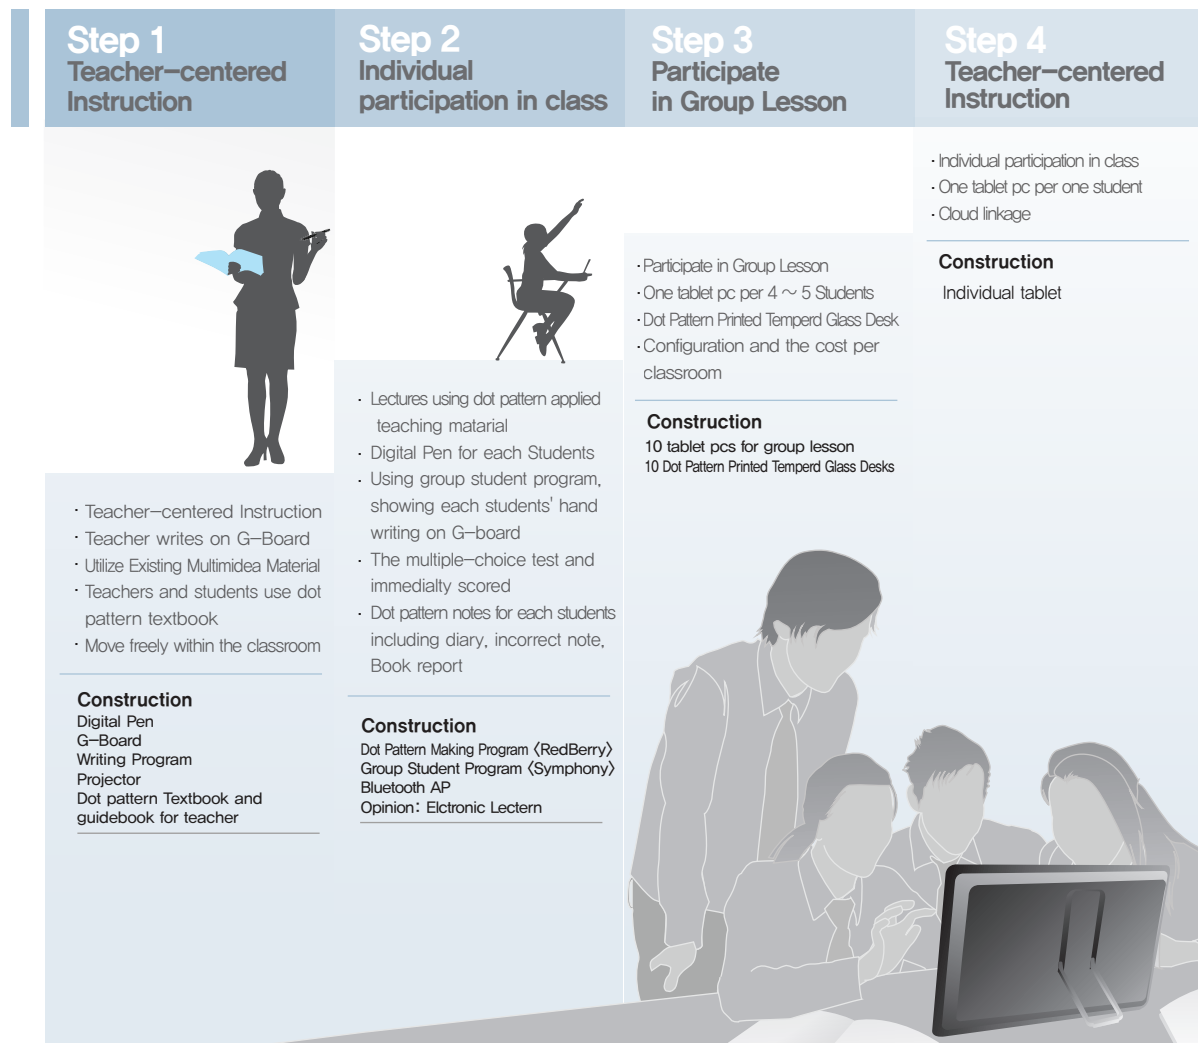

**STEP 2 Teacher + Students** (G board + pen + program)

\*Our Solution-oriented Package

**STEP 3 Teacher + Students** (G board + pen + program + 1 tablet for a group)

**STEP 4 Teacher + Students** (G board + pen + program + individual tablets)

\*Tablet Interlocking Package

# { Step1

Teacher-centered Instruction  
Teacher (Gboard + pen + program)

# { Step2

individual participation in class  
Teacher + Students (Gboard + pen + program)  
Interactive group study program with individual digital pen and dot pattern textbook including step 1

# { Step3

Participate in Group Lesson  
Teacher + Student (Gboard + pen + program + 1 tablet for a group)  
Interactive group study program with step 2 adding tablet pc for small group

# { Step4

individual participation in class  
Teacher + Student (Gboard + pen + program + individual tablets)  
Individual activities by giving each students tablet pc with step2

# Associated products

## IWB Overlay Monitor

### Recognition method

digital pen sensor corresponding dot-pattern

Screen size 5.6inch~27inch

### Product description

Dot-pattern printed tempered glass monitor.

Easy to write on the screen with digital pen

Various sizes

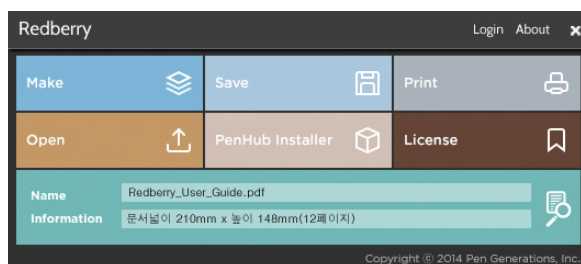

IWB Overlay Monitor Built in Electronic lecture desk or single

Cost effective

Intuitive, accurate, and fast writing speed

## Redberry

Print with ordinary printers using carbon ink. (Laser Printer)

Dot-pattern print program for presentation and teaching materials

- Size : A4
- Apply it to various printed materials, books, to be used for various applications.
- Easily print the patterns on normal paper film, and etc. more than 300 pages.
